Each Lecture is 5 Continuing Education Credits

FEBRUARY 12

Annual General Meeting (6-6:30pm)
Dinner Open to All Members

Special Lecture Schedule 1:30-9pm

A Variety of Topical Issues

This series of lectures will cover the following topical issues in veterinary medicine:

Sarah Boston, DVM, DVSc, Diplomate ACVS, ACVS Founding Fellow of Surgical Oncology

Surgical Oncology Cases – Don't Give Up on Them!

This will be a case-based discussion of surgical oncology cases that will go over some of the principles of surgical oncology and the decision-making that can go into case management. Some of the cases that seem like they have no hope can have surprising outcomes! This presentation is intended to stimulate discussion about how to make decisions about big surgeries in older patients with neoplasia.

Travis Strong, DVM

Ocular Emergencies

Ophthalmic disease is a common presentation for both routine and emergent veterinary visits. While many ophthalmic conditions are manageable on a non-emergent basis, some are indeed true emergencies if there is a chance to save vision and/or the globe itself. The intent of this presentation will be to provide an overview of the ophthalmic examination that can be performed by the non-specialist, as well as to discuss some of the most common ocular emergencies, including acute glaucoma, anterior lens luxation, ocular proptosis, acute blindness, and descemetocele/corneal perforation.

VCA Canada Veterinary Emergency & Referral Hospital

SPONSOR: IDEXX Laboratories

MARCH 5

Practical Oncology Tips

Sue Ettinger, DVM, DACVIM (Oncology)
Dr Sue Cancer Vet PLLC and The Veterinary Cancer Center

Got cancer questions? Whether it is skin masses and cytology, common tumors you deal with every day in practice, or your FAQ about chemotherapy, Dr. Sue will cover it all (well most of it)! Dr. Sue's talks will provide practical tips and tricks you can use tomorrow when you go back to work. We all hate cancer but come learn how managing these cases can be better for your patients, clients, and you.

SPONSOR: Chiron Compounding Pharmacy

APRIL 9

Dentistry Practices

Judy Rochette, DVM, FVD, Diplomate AVDC
West Coast Veterinary Dental Services

Most oral pathology is related to periodontal disease. Recognizing that disease is present (radiology, periodontal indices) and treatment options (basic and advanced periodontal surgery, extractions) will be discussed. Oral masses, benign and not so benign, and their treatment options will also be reviewed.

SPONSOR: Hill's Pet Nutrition

MAY 14

Infectious Diseases

Scott Weese, DVM, DVSc, Diplomate ACVIM
Ontario Veterinary College

This series of lectures will involve a variety of infectious disease topics, including antibiotic resistant infections, antibiotic treatment of common diseases, emerging diseases and infection control.

SPONSOR: Boehringer-Ingelheim

SEPTEMBER 10

Developments in Dermatology: 2019 and Beyond

Kinga Gortel, DVM, MS, Diplomate ACVD
Westbank Animal Care Hospital

Small animal dermatology isn't like it used to be! Recent developments have made it more rewarding and more challenging than ever before. This seminar provides practical updates on getting the most from your diagnostic techniques, treating canine atopic dermatitis, managing resistant infections, and troubleshooting treatment failures. The evening will conclude with an interactive Q & A session with Dr. Gortel and special guest, Veterinary Dermatologist Dr. Stephen Waisglass.

SPONSOR: Royal Canin

OCTOBER 1

Soft Tissue Surgery – A Review of Common Procedures

Ameet Singh, DVM, DVSc, Diplomate ACVS, ACVS Founding Fellow, Minimally Invasive Surgery
University of Guelph

This seminar on soft tissue surgery will focus on a variety of surgical procedures commonly faced by practitioners such as brachycephalic airway syndrome, cystotomy, splenectomy, gastropexy and intestinal resection and anastomosis. Novel tips and tricks to help improve success and efficiency will be provided.

SPONSOR: Elanco

NOVEMBER 12

Anesthesia Through the Decades

Craig Mosley, DVM, MSc
VCA Canada

Anesthetic practice in veterinary medicine has changed significantly over the past couple decades with improved understanding, additional drugs, better monitoring equipment and a changing patient demographic. These lectures will focus on meaningful changes and how they impact current clinical practice. A case-based approach and tools for improving patient safety will be used to provide practical "take home" solutions.

SPONSOR: Central Sales

MEMBERSHIP INCLUDES:

- Seven lecture dates of 5 hours of current continuing education designed for practitioners
- Buffet dinner included, 5-5:45pm
- TAVM online newsletter "The Scalpel"
